IM500-MK PORTABLE MONITORING KIT

FEATURES

- Visual and Thermal data and snapshots
- Alarm notifications
- Thermal trending and analytics
- GPS location
- Solar power option
- Heavy-duty travel case

KEY BENEFITS

- Quick and easy installation
- Find and repair faults before they become major issues
- Map the sites locations on information dashboard
- Monitor the condition of known trouble spots
- Instant notification of problem events

The IM500 Portable Monitoring Kit has everything you need to quickly get set up and start continuous monitoring of remote trouble spots. The IM500 and junction box are easily installed with magnetic mounts. Simply attach the IM500 to any metal surface, power it up and you are ready to start monitoring. The IM500 will detect thermal anomalies and send alarms directly to your mobile device so you will know instantly when your system is in trouble. The SWI dashboard is accessible from any web browser and provides access to daily snapshots, temperature data and alarms.
